

RIBBERNZ – a better cat toy

(Pat. Pend)

Thank you for your purchase!

RIBBERNZ are handmade locally from high quality materials. These materials are not only safe for kitty, but are sturdy and long lasting. **RIBBERNZ** has no feathers or small pieces that could be swallowed by your cat causing lacerations or blockages.

“The inside of your cat's mouth could become lacerated by feathers, and plastic bags can cause suffocation, choking or intestinal blockage. Your cat's sharp claws can also easily destroy cheap toys that contain many small, sharp parts.” - RSPCA

“It's not uncommon to see feathers incorporated into cat toys, but these avian amusements aren't safe for kittens. Kittens learn with their mouths, and are likely to chew on anything you give them, so a delicate object like a feather may wind up being chomped in half, swallowed, and lodged in the throat or stomach. Wispy, downy feathers are especially dangerous, as they are so small that it is hard for a person to notice that a kitten is eating them before troubles arise. When it comes to cat toys, it's best to leave feathers for the birds. Many cat toys on a wand have flexible string that gives when pulled. While the toys are a great way to exercise cats, if swallowed, the string can lead to dangerous consequences. If the string becomes detached from the wand, one end can get anchored in the cat's mouth, either under the tongue or looped around a rear tooth, while the other end is swallowed. The elastic string acts like a curtain on a curtain rod, looping around the intestines and pulling them towards the mouth, causing knife-like lacerations that can be fatal. ” - Pet MD

RIBBERNZ comes in a variety of colors and are interchangeable! If you would like to order a custom color combination (Team colors, favorite colors) please contact thecountrycatteryal@gmail.com. You can also order online at thecountrycattery.com/shop.
